PRINT

Upload your numbers to us through CSV format.

Adhoc

You may upload to us your contact numbers on adhoc basis. However, these numbers will be scrub against our current DNC database. The result return may exclude those numbers not in our DNC database. They will be sent for scrubbing the next business day. Current DNC database validity date : 31st March 2018. You will be notified by email once the results are ready.

Bulk

We scrub your contact numbers on our scheduled dates. The next bulk scrub date is 1st April 2018. All numbers sent up to us will be scrub, and results returned the following business day. The validity period is 30 days. You will be notified by email once the results are ready.

#### Instructions: Creating a .csv File

1. Create a text file with .csv extension. The filename must NOT contain special characters.
2. First line of text file must contain the word Contacts.
3. Enter telephone numbers to be submitted, one telephone number per row. This means the telephone numbers will form a single column in the file.
4. Each telephone number must have exactly 8 digits, and must start with a 3, 6, 8 or 9. It must not contain spaces or any other characters.
5. Please note that a large file size will take a longer time to upload. If your session expires (after 20 minutes of inactivity) during the uploading, please decrease the file size by reducing the quantity of numbers to check then upload the file again. The maximum file size that can be uploaded is 20MB.
6. For more detailed instructions on how to create the file for uploading (.csv file), refer to the document [Click here](#)

#### Select File To Upload

No file chosen
